March 28
14:00–16:30

Sawmill 25

Sawmill 25 is a sawmill complex in northwest Russia. The company is part of the Titan Group of Companies, which unites more than 20 enterprises within and outside of the Arkhangelsk Region whose core business is in the forest industry.

The core activities of Sawmill 25 include the manufacturing of export-oriented kiln-dried sawn lumber and wood pellets. Follow-up production consists of pulp chips. The enterprise specializes in processing coniferous softwood.

Company website: <http://www.sawmill25.ru/>

During the excursion to Sawmill 25, you will have the opportunity to visit the sawmill and the dried sawn timber sorting line and also view the drying complex and the wood pellet production workshop.

You can register for the excursion via the [Personal Web Office](#). Requests are accepted **until March 20, 2017**.

March 28
14:00–16:30

MRTS-Terminal

MRTS builds turnkey technical underwater facilities for trunk pipelines in the oil and gas industry.

Company website: www.mrts.ru

During the excursion to MRTS-Terminal, you will have the opportunity to view the enterprise's production site, its workshops and berths and also learn about the company's production and logistics capabilities.

You can register for the excursion via the [Personal Web Office](#). Requests are accepted **until March 20, 2017**.

March 28
12:00-17:00

Severalmaz

Severalmaz is one of Russia's youngest diamond mining enterprises. It launched industrial diamond production in 2005 with the opening of the first phase of the Lomonosov Ore Mining and Processing Plant with production capacity of 1.0 million tonnes of ore per year.

The Lomonosov deposit differs significantly from other deposits around the world in terms of the type of diamond, the level of erosional truncation and the source rock, which makes it possible to extract diamonds without the forced crushing that worsens the quality of the extracted raw materials.

Company website: <http://www.severalmaz.ru/>

During the excursion to Severalmaz, you will have the opportunity to view the shift camp, administrative building as well as quarries, the ore processing mill and the power plant.

You can register for the excursion via the [Personal Web Office](#).
Requests are accepted **until March 20, 2017**.
